

ASX ANNOUNCEMENT  
ASX Code: **BDR**

27 March 2013

## A\$25 MILLION UNDERWRITTEN INSTITUTIONAL PLACEMENT

### Overview

- Underwritten institutional placement to raise A\$25 million
- Placement to be conducted by way on an institutional bookbuild with an underwritten floor price of A\$0.89
- Beadell's 100% owned Tucano CIL Gold Plant in Brazil continues to experience strong performance. However, as previously announced Beadell experienced a delay in the commissioning of the Tucano CIL Gold Plant. In light of this delay Beadell has worked with its primary debt provider to restructure payments due under the primary debt facility. The equity raising is a requirement to satisfy the conditions of the primary debt provider in granting the restructure of repayments.

### Details

Beadell Resources Limited (**Beadell or the Company**) today announces the launch of an underwritten placement to qualified and sophisticated institutional investors (**Placement**).

The price of new shares issued under the Placement will be determined by way of a bookbuild from an underwritten minimum price of A\$0.89 per new share issued (**New Share**). The Placement will raise A\$25 million. The institutional bookbuild will be conducted aftermarket on Wednesday 27 March 2013.

The underwritten minimum floor price of A\$0.89 per New Share represents a 5.3% discount to the last trading price of A\$0.94 on Wednesday 27 March 2013.

New Shares issued under the Placement will rank equally from allotment of those shares in all respects with existing fully paid ordinary Beadell Resources shares.

Settlement of the Placement is expected to occur on 4 April 2013, with allotment expected to occur on 5 April 2013. The Placement will be made within Beadell's placement capacity and accordingly shareholder approval will not be required.

### **Background to the raising**

Beadell's 100% owned Tucano CIL Gold Plant in Brazil continues to experience strong performance and is currently producing above nameplate following first gold pour achieved in December 2012. However, as previously announced Beadell experienced a delay in the commissioning of the Tucano CIL Gold Plant. In light of this delay Beadell has worked with its primary debt provider to restructure payments due under the primary debt facility. To satisfy the conditions of the restructure the primary debt provider requires that Beadell undertake an equity raising to further strengthen its balance sheet.

Approximately US\$8 million of the equity raising will be used to pay down all outstanding capital expenditure invoices on the CIL gold plant which was completed in December 2012. The remainder of the funds will be used to bolster the Company's balance sheet and cash reserves.

As at 31 December 2012, Beadell had fully drawn the primary debt facility to US\$110 million. Beadell expects to repay US\$72 million of this facility by 31 December 2013 through the expected future cash flows from the Tucano CIL Gold Plant in Brazil. The Tucano CIL Gold Plant is progressing well with throughput at the SAG Mill continuing to improve with a consistent feed rate significantly over nameplate of 3.5 million tonnes per annum with incremental increases ongoing. The magnetic separation plant is nearing completion and is tracking slightly below budget with commissioning to commence in late April. Approvals for the ultra high grade oxide deposit, Duckhead, are progressing very well with full approvals expected over the coming weeks.
